

[RECIPE FOR PERFORMANCE]

Manual on how to beat the snake with the thunderbolt to produce rain

Bosko Begovic

1. Take the box, any box on your disposal, and write the word *snake* on it. Use a marker, or any kind of tool that would be suitable enough to produce written content/text.
2. Use another box to write *thunderbolt* on it, using the same or a different tool, both necessarily sufficient to produce written content—or, the text.
3. Now that you have the word *snake* and the word *thunderbolt*, take the thunderbolt and beat the snake with the bolt. How is this to be done? Take the box that has *thunderbolt* written on it and hit 10 times the box with the word *snake*.
4. As a result, write *rain* on a piece of paper, using the same or similar tool that can provide you with the function of producing text.
5. If you want more rain, repeat the procedure explained under section 3 and write *rain* on another piece of paper. Repeat the procedure depending on how much rain you would like.
6. Feel free to engage more people in the ritual, if you want to produce more rain.
7. This remedy is for general use and can be taken without the supervision of the shaman.
8. For help contact the nearest accredited shaman, or the nearest artist.
