

Glitter carpet: Take Me With You

Proposal:

Create a 'carpet' of glitter in a gallery

Conceived 2011

Project specification:

The floor in an otherwise empty gallery/room is covered with a carpet of 0.75 mm hexagon cut pvc glitter - colour to be selected by the artist in dialogue with the curator/director - to a depth of between 3 and 5 mm.

Visitors, and staff, should enter and leave the gallery/room as usual.

Care and maintenance routines:

The carpet can be raked to maintain even coverage.

The carpet should be refreshed with additional glitter so that the coverage and depth is maintained for the duration of the project.

Glitter that is transferred to adjacent galleries/rooms should only be removed if the gallery/room is one of a series of rooms in a multi-gallery/room venue.

Glitter that is transferred beyond the perimeter of the host establishment should be left as it is.
